As a Software Engineering student with a strong foundation in both software and hardware, I've been passionate about technology since I was nine years old. I have hands-on experience with React, Python, HTML, CSS, JavaScript, and API development, and I am constantly expanding my skills set to stay ahead in this fast-evolving field.

My goal is to blend my academic knowledge with real-world experience to design and develop innovative, scalable solutions. I thrive on collaborating with others, solving complex challenges, and contributing to meaningful projects that make a real impact in the tech industry.

Skills & abilites

- Multitasking
- Analytical Thinking
- Teamwork
- Problem Solving
- Programming & Development
- Communication
- Creativity
- Adaptability
- Proactive
- Logical Thinking

Lenguages

- Portuguese
- English
- Spanish

Projects

User registration manager

Developed a user registration system for an association, integrating the frontend interface with a database through an API to streamline the registration process.
Skills:
GIT
Python
RESTful API
SQL
JWT Authentication
